Liberty Galati is the largest integrated steel company in Romania and a leader in the manufacture of steel products. They are one of the most important companies of the region Galati, and contribute not only to the economy but also with the training of students.
In 2014, the Galați Steel Plant started an educational programme to attract new young workers and to support the local technical educational and vocational system. The School of Apprentices is a paid programme dedicated to young high school and professional schools graduates. It takes place over a period of 18 months, in two stages. Also since 2014, the company started the annual Scholarships Program for the best students in the last years of studies who want to join then after graduation. The importance of the company and their educative programs are based in more than 6.000 workers and more than 200 students formed in the company each year. We attended there how students study there and their main ways to be formed.

Friday June 11th 2021

- Presentation about migration, asylum and integration of foreigners in Romania
Mr. Cornel Constantinescu, representing regional Public Organization for the asylum and migration, told us about main ways for migrants to enter Romania and programs to work with them. Mostly come from countries like Afghanistan, Syria and Iraq, and they work in their integration in 6 centers in different places in Romania. Young children must take part of educational programs, and it includes learning about professional and general competences and also in Romanian.
- Presentation about VET education in the county Galați.
Mrs. Corina Tatu, educational inspector of the Romanian Ministry of Education in Galati, told partners about general and VET system in Romania. VET is integrated in the Secondary Education that has three channels: general, vocational and technological. Technical studies have three areas: natural resources and environmental protection, services and technical. Vocational Education, lasting three years, may be state and dual. In the Dual system, practical lessons increase during the program, up to 72% in the third year. In the dual training, students can be examined before they can start this kind of studies.

- ROCT platform.
Mrs. Mioara Țenea explained the ROCT project; a practical method of acquiring knowledge from various school subjects based on the entrepreneurial skills, improving professional behaviors and students' own potential. It is a model of real enterprise applicable in all economic fields, starting from basic functions to all the management areas. This App is similar to the “Training firms” that we saw in Slovakia, and “Prodetur” saw in Spain. In difference between
- Promotion of company ABSVETPRO
